About us:

MTS is a sourcing Service and consulting organization that helps domestic and global companies to expand the business in Indian market. MTS offers business sourcing solutions with specific focus in Indian and International market.

MTS's key strength is its knowledge of Indian market (low cost country), well versed with product and requirement, technical sound team to manage and execute customer projects strategically and tactically in a very professional manner. MTS aim is to work with knowledge and professionalism to cater the requirements of domestic and global clients looking to expand business globally.

MTS has multi sectoral focus including Valve, Pump, General Engineering, Precise Engineering, Heavy industries, Ship Building by a team which is highly experienced in Indian market. As many businesses across globe are approaching India, MTS is a preference for many global organizations to grow the business. MTS is able to understand the gaps of understanding that exist when global businesses enter into Indian market.

Expertise:

MTS has high level relationship with Indian and Global companies for requirement of any type of Sand & Investment Casting, Forging, Fabrication, Precisemachined components, general engineering components, Raw material etc. MTS supports customers a comprehensive and long term relationship with "win-win" objective by providing sound supplier database, wide network, thorough product knowledge, technically sound team.

In a current global competition, it is essential to remain competitive. MTS provides sourcing options from India where suppliers are supporting with competitive price to meet the global demand. MTS provides gateway for Global customers to source from India with best price and best quality.

MTS offers its clients comprehensive and satisfying sourcing solutions with the help of well-connected supplier network. Our focus is to meet customer's requirements by offering market best competitive prices for any kind of engineering and raw material products, ensuring high level of quality standards and adhering to stipulated shipment deadlines.

With proper and timely communication with customers, we take responsibility to source products of high quality, appropriate packaging and most important timely delivery.

We provide the services by assessing:

- ® Customer requirement thoroughly
- ® Strategic and Tactical roadmap
- ® Supplier identification, assessment and selection
- ® Competitive price from market
- ® Supplier integration and project timeline

Our Business:

We supplies product and product subassembly as per customer requirement todomestic and global customers.

We delivers quality sourcing from India for all graded ferrous – nonferrous sand castings up to 15 ton single piece weight and investment castings up to 350 kg single piece weight (steel, stainless steel, duplex steel, special alloy, cast iron, ductile iron, alluminium and copper graded), fabrication and sheet metal works, Heavy engineering components, Close and Open die forgings and machined forging, Bar turned and machined parts, Precision machined components etc.

We ensure the quality with the product development process – PPAP, Quality management, Quality control & inspection, NCR-CAPA& 8D, Audits-assessment and upgradation of suppliers, supplier performance monitoring (OTD & DPPM), logistic and export packaging etc.

We help customers quickly and effectively to manage Prototype, preproduction and product implementation through design suggestion, VA/VE, ideas, lean manufacturing, component sourcing, manufacturing and assembly with lowest cost option.

We deliver the product as per customer requirement to manufacturing facility, ware house or logistic provider as per agreed terms.
